Experience

- ❖ **July 2017 - Present: IT Consultant for Massell Commercial Real Estate**
 - Designed a refreshed version of the logo, and developed a static site with Wordpress to showcase current property listing and investment opportunities
- ❖ **July 2016 - Present: VIP Host for Live Nation across various local venues**
 - Usher season ticket clients to their seats during concerts, maintain VIP areas to be fully furnished with amenities before shows start, and tidy up areas afterwards. Upsell the Premium Seating Program when possible.
- ❖ **July 2014 - Present: Multiple Personal Web Development Graphic Design Projects**
 - Designed and developed various web application projects as part of the Iron Yard, local Hackathons and Startup Weekends, as well as for personal business purposes that center around politics, economics, journalism, and education.
- ❖ **October 2015 - December 2016: Tech Writer for Dynamic Data Services Inc.**
 - Managed and maintained Microsoft SharePoint site. Aggregating, organizing and formatting emails as part of distributed lists.
- ❖ **May 2013 - June 2014: Portfolio Analyst for Indigo Payments -**
 - Developed and maintained customer database to analyse client sales for actionable intelligence for management. The management team used this database to increase customer retention rates and focus on key customer service cases.
- ❖ **June - August 2011: Volunteer for Children's Restoration Network -**
 - Organized playlist and artist schedule for World's Longest Concert fundraiser.
- ❖ **June - August 2010: Summer internship with Protocol Entertainment -**
 - Reorganized database and promoted clients PR campaigns.
- ❖ **June - August 2009: Summer internship with Blind Ambition Management -**
 - Tour and transportation scheduling for clients and video editing for marketing purposes.

Featured Hackathons and Projects

- ❖ **August 2015: ATDC Weekend Hackathon -**
 - Lead team on design of backend functionality for platform to submit common application for gig economy companies.
- ❖ **February 2015: Goodie Hack Atlanta (Accelerate with Google) -**
 - Created webform for individuals to sign up for non-profit organization and register them to email campaigns.
- ❖ **November 2014: Iron Yard Final Project -**
 - Built web application that connected article bookmark API with a natural language processor API for content tagging and organization.
- ❖ **October 2014: Iron Yard Hackathon - *Placed first in competition.***
 - Built backend database API with Ruby on Rails for iOS application with conversion to full web application. Database consisted of user photos of clouds in order to play guessing games with friends.
- ❖ **September 2014: Startup Weekend Education Atlanta (UP Global) - *Placed third in competition.***
 - Built frontend interface and backend database for classroom question bank to use in homework, quizzes or tests. Gamified platform for students to create and answer each other's questions based on the teacher's lesson plans.
